Account	A financial tool for tracking value accrued for a particular purpose. In the healthcare field, used to track charges for a patient, cost centers, etc.	OpenMRS data model doesn't contain a resource that match the Account resource
ActivityDefinition	This resource allows for the definition of some activity to be performed, independent of a particular patient, practitioner, or other performance context.	OpenMRS data model doesn't contain a resource that match the ActivityDefinition resource
AllergyIntolerance	Risk of harmful or undesirable, physiological response which is unique to an individual and associated with exposure to a substance.	Supported
AdverseEvent	Actual or potential/avoided event causing unintended physical injury resulting from or contributed to by medical care, a research study or other healthcare setting factors that requires additional monitoring, treatment, or hospitalization, or that results in death.	Newly introduced resource and maturity level is 0 of the resource. I couldn't find a matching resource for this resource.
Appointment	A booking of a healthcare event among patient(s), practitioner(s), related person(s) and/or device(s) for a specific date/time. This may result in one or more Encounter(s).	Supported

AppointmentResponse	A reply to an appointment request for a patient and/or practitioner(s), such as a confirmation or rejection. \	This holds a confirmation or rejection of an appointment. Current openmrs appointment holds the status and there is no separate response resource. If needed it's possible to create partial object from openmrs appointment and return as a response.
AuditEvent	A record of an event made for purposes of maintaining a security log. Typical uses include detection of intrusion attempts and monitoring for inappropriate usage.	Couldn't find a matching resource
Basic	Basic is used for handling concepts not yet defined in FHIR, narrative-only resources that don't map to an existing resource, and custom resources not appropriate for inclusion in the FHIR specification.	Couldn't find a matching resource. May be use this in a custom concepts
Binary	A binary resource can contain any content, whether text, image, pdf, zip archive, etc.	Couldn't find a matching resource. May be can use when handling files

BodySite	Record details about the anatomical location of a specimen or body part. This resource may be used when a coded concept does not provide the necessary detail needed for the use case.	Couldn't find a match resource
Bundle	A container for a collection of resources.	Supported by default. I have go through the fhir module. It use the bundle in several places. Bundle returns in places where it returns collection of resources such as searching patients.
CapabilityStatement	A Capability Statement documents a set of capabilities (behaviors) of a FHIR Server that may be used as a statement of actual server functionality or a statement of required or desired server implementation.	This seems to be a enhancement of conformance statement which support default by hapi fhir library
CarePlan	Describes the intention of how one or more practitioners intend to deliver care for a particular patient, group or community for a period of time, possibly limited to care for a specific condition or set of conditions.	Couldn't find matching resource

CareTeam	The Care Team includes all the people and organizations who plan to participate in the coordination and delivery of care for a patient.	Couldn't find matching resource. May be can use when grouping of team needed
ChargeItem	The resource ChargeItem describes the provision of healthcare provider products for a certain patient, therefore referring not only to the product, but containing in addition details of the provision, like date, time, amounts and participating organizations and persons. Main Usage of the ChargeItem is to enable the billing process and internal cost allocation.	Can't find matching resource
Claim	The resource ChargeItem describes the provision of healthcare provider products for a certain patient, therefore referring not only to the product, but containing in addition details of the provision, like date, time, amounts and participating organizations and persons. Main Usage of the ChargeItem is to enable the billing process and internal cost allocation.	Couldn't find matching resource
ClaimResponse	This resource provides the adjudication details from the processing of a Claim resource.	Couldn't find matching resource

ClinicalImpression	A record of a clinical assessment performed to determine what problem(s) may affect the patient and before planning the treatments or management strategies that are best to manage a patient's condition. Assessments are often 1:1 with a clinical consultation / encounter, but this varies greatly depending on the clinical workflow. This resource is called "ClinicalImpression" rather than "ClinicalAssessment" to avoid confusion with the recording of assessment tools such as Apgar score.	Couldn't find matching resource
CodeSystem	A code system resource specifies a set of codes drawn from one or more code systems.	Couldn't find matching resource
Communication	An occurrence of information being transmitted; e.g. an alert that was sent to a responsible provider, a public health agency was notified about a reportable condition.	Couldn't find matching resource
CommunicationRequest	A request to convey information; e.g. the CDS system proposes that an alert be sent to a responsible provider, the CDS system proposes that the public health agency be notified about a reportable condition.	Couldn't find matching resource

CompartmentDefinition	A compartment definition that defines how resources are accessed on a server.	Couldn't find matching resource
Composition	A set of healthcare-related information that is assembled together into a single logical document that provides a single coherent statement of meaning, establishes its own context and that has clinical attestation with regard to who is making the statement. While a Composition defines the structure, it does not actually contain the content: rather the full content of a document is contained in a Bundle, of which the Composition is the first resource contained.	This is used in encounter search results return resources
ConceptMap	A statement of relationships from one set of concepts to one or more other concepts - either code systems or data elements, or classes in class models.	OpenMRS ConceptMap defines mapping from concept to ConceptSource. But ConceptMap of FHIR shows mapping of one concept to a set of concepts. I don't think they matches each other.
Condition (aka Problem)	A clinical condition, problem, diagnosis, or other event, situation, issue, or clinical concept that has risen to a level of concern.	Supported

Consent	A record of a healthcare consumer's policy choices, which permits or denies identified recipient(s) or recipient role(s) to perform one or more actions within a given policy context, for specific purposes and periods of time.	Couldn't find matching resource
Contract	A formal agreement between parties regarding the conduct of business, exchange of information or other matters.	Couldn't find matching resource
Coverage	Financial instrument which may be used to reimburse or pay for health care products and services.	Couldn't find matching resource
DataElement	The formal description of a single piece of information that can be gathered and reported.	Couldn't find matching resource
DetectedIssue	Indicates an actual or potential clinical issue with or between one or more active or proposed clinical actions for a patient; e.g. Drug-drug interaction, Ineffective treatment frequency, Procedure-condition conflict, etc.	Couldn't find matching resource

Device	This resource identifies an instance or a type of a manufactured item that is used in the provision of healthcare without being substantially changed through that activity. The device may be a medical or non-medical device. Medical devices include durable (reusable) medical equipment, implantable devices, as well as disposable equipment used for diagnostic, treatment, and research for healthcare and public health. Non-medical devices may include items such as a machine, cellphone, computer, application, etc.	Couldn't find matching resource
DeviceComponent	The characteristics, operational status and capabilities of a medical-related component of a medical device.	Couldn't find matching resource
DeviceMetric	Describes a measurement, calculation or setting capability of a medical device.	Couldn't find matching resource
DeviceRequest	Represents a request for a patient to employ a medical device. The device may be an implantable device, or an external assistive device, such as a walker.	Couldn't find matching resource

DeviceUseStatement	A record of a device being used by a patient where the record is the result of a report from the patient or another clinician.	Couldn't find matching resource
DiagnosticReport	The findings and interpretation of diagnostic tests performed on patients, groups of patients, devices, and locations, and/or specimens derived from these. The report includes clinical context such as requesting and provider information, and some mix of atomic results, images, textual and coded interpretations, and formatted representation of diagnostic reports.	Supported
DocumentManifest	A reference to a document.	Couldn't find matching resource
DocumentReference	A reference to a document.	Couldn't find matching resource

EligibilityRequest	The EligibilityRequest provides patient and insurance coverage information to an insurer for them to respond, in the form of an EligibilityResponse, with information regarding whether the stated coverage is valid and in-force and optionally to provide the insurance details of the policy.	Couldn't find matching resource
EligibilityResponse	This resource provides eligibility and plan details from the processing of an Eligibility resource.	Couldn't find matching resource
Encounter	An interaction between a patient and healthcare provider(s) for the purpose of providing healthcare service(s) or assessing the health status of a patient.	Supported
Endpoint	The technical details of an endpoint that can be used for electronic services, such as for web services providing XDS.b or a REST endpoint for another FHIR server. This may include any security context information.	Couldn't find matching resource

EnrollmentRequest	This resource provides the insurance enrollment details to the insurer regarding a specified coverage.	Couldn't find matching resource
EnrollmentResponse	This resource provides enrollment and plan details from the processing of an Enrollment resource.	Couldn't find matching resource
EpisodeOfCare	An association between a patient and an organization / healthcare provider(s) during which time encounters may occur. The managing organization assumes a level of responsibility for the patient during this time.	Couldn't find matching resource
ExpansionProfile	Resource to define constraints on the Expansion of a FHIR ValueSet.	Couldn't find matching resource

ExplanationOfBenefit	This resource provides: the claim details; adjudication details from the processing of a Claim; and optionally account balance information, for informing the subscriber of the benefits provided.	Couldn't find matching resource
FamilyMemberHistory	Significant health events and conditions for a person related to the patient relevant in the context of care for the patient.	Couldn't find matching resource
Flag	Prospective warnings of potential issues when providing care to the patient.	Couldn't find matching resource
Goal	Describes the intended objective(s) for a patient, group or organization care, for example, weight loss, restoring an activity of daily living, obtaining herd immunity via immunization, meeting a process improvement objective, etc.	Couldn't find matching resource

GraphDefinition	A formal computable definition of a graph of resources - that is, a coherent set of resources that form a graph by following references. The Graph Definition resource defines a set and makes rules about the set.	Couldn't find matching resource
Group	Represents a defined collection of entities that may be discussed or acted upon collectively but which are not expected to act collectively and are not formally or legally recognized; i.e. a collection of entities that isn't an Organization.	Couldn't find matching resource
GuidanceResponse	A guidance response is the formal response to a guidance request, including any output parameters returned by the evaluation, as well as the description of any proposed actions to be taken.	Couldn't find matching resource
HealthcareService	The details of a healthcare service available at a location.	Couldn't find matching resource

ImagingManifest	A text description of the DICOM SOP instances selected in the ImagingManifest; or the reason for, or significance of, the selection.	Couldn't find matching resource
ImagingStudy	Representation of the content produced in a DICOM imaging study. A study comprises a set of series, each of which includes a set of Service-Object Pair Instances (SOP Instances - images or other data) acquired or produced in a common context. A series is of only one modality (e.g. X-ray, CT, MR, ultrasound), but a study may have multiple series of different modalities.	Couldn't find matching resource
Immunization	Describes the event of a patient being administered a vaccination or a record of a vaccination as reported by a patient, a clinician or another party and may include vaccine reaction information and what vaccination protocol was followed.	Couldn't find matching resource

ImmunizationRecommendation	A set of rules of how FHIR is used to solve a particular problem. This resource is used to gather all the parts of an implementation guide into a logical whole and to publish a computable definition of all the parts.	Couldn't find matching resource
ImplementationGuide	A set of rules of how FHIR is used to solve a particular problem. This resource is used to gather all the parts of an implementation guide into a logical whole and to publish a computable definition of all the parts.	Couldn't find matching resource
Library	The Library resource is a general-purpose container for knowledge asset definitions. It can be used to describe and expose existing knowledge assets such as logic libraries and information model descriptions, as well as to describe a collection of knowledge assets.	Couldn't find matching resource
Linkage	Identifies two or more records (resource instances) that are referring to the same real-world "occurrence".	Couldn't find matching resource

List	A set of information summarized from a list of other resources.	Couldn't find matching resource
Location	Details and position information for a physical place where services are provided and resources and participants may be stored, found, contained or accommodated.	Supported
Measure	The Measure resource provides the definition of a quality measure.	Couldn't find matching resource
MeasureReport	The MeasureReport resource contains the results of evaluating a measure.	Couldn't find matching resource

Media	A photo, video, or audio recording acquired or used in healthcare. The actual content may be inline or provided by direct reference.	Couldn't find matching resource
Medication	This resource is primarily used for the identification and definition of a medication. It covers the ingredients and the packaging for a medication.	Couldn't find matching resource. Will be look to match Drug.
MedicationAdministration	Describes the event of a patient consuming or otherwise being administered a medication. This may be as simple as swallowing a tablet or it may be a long running infusion. Related resources tie this event to the authorizing prescription, and the specific encounter between patient and health care practitioner.	Couldn't find matching resource.
MedicationDispense	Indicates that a medication product is to be or has been dispensed for a named person/patient. This includes a description of the medication product (supply) provided and the instructions for administering the medication. The medication dispense is the result of a pharmacy system responding to a medication order.	Couldn't find matching resource.

MedicationRequest	An order or request for both supply of the medication and the instructions for administration of the medication to a patient. The resource is called "MedicationRequest" rather than "MedicationPrescription" or "MedicationOrder" to generalize the use across inpatient and outpatient settings, including care plans, etc., and to harmonize with workflow patterns.	Couldn't find matching resource. Will be look to match DrugOrder
MedicationStatement	A record of a medication that is being consumed by a patient. A MedicationStatement may indicate that the patient may be taking the medication now, or has taken the medication in the past or will be taking the medication in the future. The source of this information can be the patient, significant other (such as a family member or spouse), or a clinician. A common scenario where this information is captured is during the history taking process during a patient visit or stay. The medication information may come from sources such as the patient's memory, from a prescription bottle, or from a list of medications the patient, clinician or other party maintains The primary difference between a medication statement and a medication administration is that the medication administration has complete administration information and is based on actual administration	Couldn't find matching resource.

	information from the person who administered the medication. A medication statement is often, if not always, less specific. There is no required date/time when the medication was administered, in fact we only know that a source has reported the patient is taking this medication, where details such as time, quantity, or rate or even medication product may be incomplete or missing or less precise. As stated earlier, the medication statement information may come from the patient's memory, from a prescription bottle or from a list of medications the patient, clinician or other party maintains. Medication administration is more formal and is not missing detailed information.	
MessageDefinition	The header for a message exchange that is either requesting or responding to an action. The reference(s) that are the subject of the action as well as other information related to the action are typically transmitted in a bundle in which the MessageHeader resource instance is the first resource in the bundle.	Couldn't find matching resource.

MessageHeader		Couldn't find matching resource
NamingSystem	A curated namespace that issues unique symbols within that namespace for the identification of concepts, people, devices, etc. Represents a "System" used within the Identifier and Coding data types.	Couldn't find matching resource
NutritionOrder	A request to supply a diet, formula feeding (enteral) or oral nutritional supplement to a patient/resident.	Couldn't find matching resource
Observation	Measurements and simple assertions made about a patient, device or other subject.	Supported

OperationDefinition	A formal computable definition of an operation (on the RESTful interface) or a named query (using the search interaction).	Couldn't find matching resource
OperationOutcome	A collection of error, warning or information messages that result from a system action.	Supported. Used to send error responses.
Organization	A formally or informally recognized grouping of people or organizations formed for the purpose of achieving some form of collective action. Includes companies, institutions, corporations, departments, community groups, healthcare practice groups, etc.	Couldn't find matching resource
Parameters		Couldn't find matching resource

Patient	Demographics and other administrative information about an individual or animal receiving care or other health-related services.	Supported
PaymentNotice	This resource provides payment details and claim references supporting a bulk payment.	Couldn't find matching resource
PaymentReconciliation		Couldn't find matching resource
Person	Demographics and administrative information about a person independent of a specific health-related context.	Supported
PlanDefinition	A person who is directly or indirectly involved in the provisioning of healthcare.	Couldn't find matching resource

Practitioner		Supported
PractitionerRole	A specific set of Roles/Locations/specialties/services that a practitioner may perform at an organization for a period of time.	Couldn't find matching resource
Procedure	An action that is or was performed on a patient. This can be a physical intervention like an operation, or less invasive like counseling or hypnotherapy.	Couldn't find matching resource
ProcedureRequest	A record of a request for diagnostic investigations, treatments, or operations to be performed.	Couldn't find matching resource

ProcessRequest	This resource provides the target, request and response, and action details for an action to be performed by the target on or about existing resources.	Couldn't find matching resource
ProcessResponse	This resource provides processing status, errors and notes from the processing of a resource.	Couldn't find matching resource
Provenance	Provenance of a resource is a record that describes entities and processes involved in producing and delivering or otherwise influencing that resource. Provenance provides a critical foundation for assessing authenticity, enabling trust, and allowing reproducibility. Provenance assertions are a form of contextual metadata and can themselves become important records with their own provenance. Provenance statement indicates clinical significance in terms of confidence in authenticity, reliability, and trustworthiness, integrity, and stage in lifecycle (e.g. Document Completion - has the artifact been legally authenticated), all of which may impact security, privacy, and trust policies.	Couldn't find matching resource

Questionnaire	A structured set of questions intended to guide the collection of answers from end-users. Questionnaires provide detailed control over order, presentation, phraseology and grouping to allow coherent, consistent data collection.	Couldn't find matching resource
QuestionnaireResponse	A structured set of questions and their answers. The questions are ordered and grouped into coherent subsets, corresponding to the structure of the grouping of the questionnaire being responded to.	Couldn't find matching resource
ReferralRequest	Used to record and send details about a request for referral service or transfer of a patient to the care of another provider or provider organization.	Couldn't find matching resource
RelatedPerson	Information about a person that is involved in the care for a patient, but who is not the target of healthcare, nor has a formal responsibility in the care process.	Couldn't find matching resource

RequestGroup	A group of related requests that can be used to capture intended activities that have inter-dependencies such as "give this medication after that one".	Couldn't find matching resource
ResearchStudy	A process where a researcher or organization plans and then executes a series of steps intended to increase the field of healthcare-related knowledge. This includes studies of safety, efficacy, comparative effectiveness and other information about medications, devices, therapies and other interventional and investigative techniques. A ResearchStudy involves the gathering of information about human or animal subjects.	Couldn't find matching resource
ResearchSubject	A process where a researcher or organization plans and then executes a series of steps intended to increase the field of healthcare-related knowledge. This includes studies of safety, efficacy, comparative effectiveness and other information about medications, devices, therapies and other interventional and investigative techniques. A ResearchStudy involves the gathering of information about human or animal subjects.	

RiskAssessment	An assessment of the likely outcome(s) for a patient or other subject as well as the likelihood of each outcome.	Couldn't find matching resource
Schedule	A container for slots of time that may be available for booking appointments.	Couldn't find matching resource
SearchParameter	A search parameter that defines a named search item that can be used to search/filter on a resource.	Couldn't find matching resource
Sequence	Raw data describing a biological sequence.	Couldn't find matching resource
ServiceDefinition	The ServiceDefinition describes a unit of decision support functionality that is made available as a service, such as immunization modules or drug-drug interaction checking.	Couldn't find matching resource

Slot	A slot of time on a schedule that may be available for booking appointments.	Couldn't find matching resource
Specimen	A sample to be used for analysis.	Couldn't find matching resource
StructureDefinition	A definition of a FHIR structure. This resource is used to describe the underlying resources, data types defined in FHIR, and also for describing extensions and constraints on resources and data types.	Couldn't find matching resource
StructureMap	A Map of relationships between 2 structures that can be used to transform data.	Couldn't find matching resource

Subscription	The subscription resource is used to define a push based subscription from a server to another system. Once a subscription is registered with the server, the server checks every resource that is created or updated, and if the resource matches the given criteria, it sends a message on the defined "channel" so that another system is able to take an appropriate action.	Couldn't find matching resource
Substance	A homogeneous material with a definite composition.	Couldn't find matching resource
SupplyDelivery	Record of delivery of what is supplied.	Couldn't find matching resource
SupplyRequest	A record of a request for a medication, substance or device used in the healthcare setting.	Couldn't find matching resource

Task	A task to be performed.	Couldn't find matching resource
TestScript	A structured set of tests against a FHIR server implementation to determine compliance against the FHIR specification.	Couldn't find matching resource
TestReport	A summary of information based on the results of executing a TestScript.	Couldn't find matching resource
ValueSet	A value set specifies a set of codes drawn from one or more code systems.	Couldn't find matching resource
VisionPrescription	An authorization for the supply of glasses and/or contact lenses to a patient.	Couldn't find matching resource
